

Groggery - Responsive Bar & Restaurant Template

General description

Groggery is a fully responsive single page HTML5 template. It is ideal for restaurants, bars, cafes, bakeries, and coffee shops. Built with Bootstrap v3, it looks perfect on all major browsers, tablets, and phones. Groggery is packed with everything you need to create a new website from scratch: beautiful menu with unlimited categories, sorting and filtering capabilities, image gallery, reservation and newsletter sections, and many more. Feel free to visit the [preview link](#) or contact us with a feature request.

Key features

- Built with Bootstrap v3
- Fully responsive layout
- CSS3 and source LESS files included
- Isotope plugin included
- Lightbox plugin included
- Ionicons included
- Clean and developer friendly code
- Free updates
- Support by e-mail

Sections

- Welcome
- About
- Team
- Menu
- Gallery
- Review
- Events
- Reservation
- Contacts
- Footer

Current release is 1.0.0. Buying this template now you become eligible to free download all of its future updates including new pages and neat options.

Stay tuned

Instructions

Template structure

- `/index.html` - the main HTML page you need to modify with your content.
- `/assets` - contains images, plugins and other third party assets used in the template.
 - `/bootstrap` - contains original Bootstrap files. It is not recommended to modify files in this folder, unless you want to update to a later version of Bootstrap v3 (when available).
 - `/css` - contains the main compiled CSS file used in the template.
 - `/less` - contains source LESS files.
 - `/js` - contains custom JS scripts.
 - `/plugins` - contains thirdparty plugins used in the template.
 - `/img` - contains images used in the template.
 - `/favicon` - contains the 16x16 favicon.

Original Bootstrap LESS files, along with customized elements styles, are all imported into the main `/less/styles.less` file that is then compiled into `/css/styles.css`. Feel free to modify the source LESS files located in the `/less` folder, or work with the `/css/styles.css` file directly.

Photos

All photos in the preview are not included into the download file. Please follow the steps below in order to replace them with your custom images:

- **index.html**
Please find an `` tag that you need and replace its `"src"` attribute content with an actual link to your image (e.g. ``).
- **styles.css**
Please find a selector that you need and replace its `"url"` value content with an actual link to your image (e.g. `background: url("../img/your_photo.jpg");`).

FAQ

How do I change the logo?

Please open `index.html` and find this line:

```
<a class="navbar-brand" href="index.html">Groggery</a>
```

Replace the brand name with your custom one or use an image of your choice (using an image for the logo will require additional styles).

How do I remove a section I don't need?

If you want to remove a section that you don't want to have on your website (e.g. newsletter), please open *index.html* and find the section you want to remove:

```
<section class="section_newsletter">...</section>
```

Remove the *section* tag with all of its content to remove the section entirely.

Alternatively, you can use the *.hidden* class to hide the section on the screen keeping the code.

```
<section class="section_newsletter hidden">...</section>
```

Are reservation and newsletter forms functional?

No, both reservation and newsletter forms are not functional at the moment. You need to hook up your own scripts to make them work.
